Reflective Address Markers

Imagine an investment of $25.00 that could save lives and property during a fire or medical emergency. Reflective signs that clearly identify house address numbers can help firefighters, paramedics, and police find your house more quickly.

Most house numbers are visible during daylight and ideal weather conditions, but try to find that same house number after dark or during inclement weather. Having to search for an identifying number can delay a fire, ambulance, or police response when every second counts. Shaving even a few seconds off response times can make that small investment for a reflective sign a worthwhile expense.

The Inverness Fire Protection District is offering two address identification options to residents for purchase. Both options are currently in use throughout the Inverness Fire District and assist first responders in quickly locating the proper address.

- Reflective Address sign posts - These sign posts, with highly reflective numbers, enable first responders to find your address, even if your house is on the opposite side of the street from your mailbox. The signs are constructed of durable plastic and available to District residents for $25 per sign, including reflective numbers. Free delivery and installation are available.

- Reflective Mailbox Sign – These smaller signs are designed to be attached directly to your mailbox post, should your mailbox be located on the correct side of the street and near your driveway. They include highly reflective numbers and are available to District residents for $25 per sign, including reflective numbers. Free delivery and installation are available.

If you would like to purchase either type of address sign for your home or have any questions, please contact us at (847) 991-8700 or e-mail us at info@invernessfpd.org
